

## **Send Governor Newsom a Social Media Message to #SaveSolar**

Send Governor Newsom a social media message asking him to stand up to PG&E and keep rooftop solar growing. There's strength in numbers, and the more messages we send him, the more likely we can make him pay attention!

Here is a sample post that you can share on Facebook, Twitter, and/or Instagram. Feel free to customize, add a photo, or whatever to make it yours!

***California should not penalize people who go solar or slash the net metering credit by 80%. More solar, not less!***

***@GavinNewsom please #SaveSolar***
